

## Commercial Kitchen & Food Processing Equipment

Commercial kitchen and food processing equipment losses pose distinct challenges for insurers and policyholders. Hotels, restaurants, theme parks, casinos, airports and hospitals all possess business critical commercial kitchen and food preparation equipment that they rely on to deliver services to their clients. Similarly, food processing operations can be severely impacted when mechanical or electrical systems like conveyors and control panels are damaged.

Whether there has been a fire, flood or equipment failure, stakeholders are focused on minimizing business interruption and extra expense, while also being concerned with cleanliness and safety standards inherent to the food preparation and processing industries.

AREPA has experience performing equipment restoration on commercial kitchen and food processing equipment including:

- ▶ **Electrical panels containing programmable logic controllers**
- ▶ **Conveyor systems, rollers & sensors**
- ▶ **Commercial cooktops and ovens**
- ▶ **Industrial dishwashers**
- ▶ **Exhaust hood system**
- ▶ **Food preparation equipment**
- ▶ **Walk-in and drive-in refrigerators and freezers**
